PROFESSIONAL SUMMARY

Senior Software Developer with strong experience in React, Next.js, Node.js, and Python, building scalable web applications and contributing to open-source Bitcoin projects. Currently a Senior Developer at Bitcoin Dada Devs, leading peer leads, mentoring female developers and alumni, and training contributors in the Mastering Bitcoin pathway. Proven ability to ship production-ready features and integrate secure backend services. Passionate about clean code, performance, and user-centered design.

TECHNICAL SKILLS

Frontend: React, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind, responsive UI
Testing: Jest, React Testing Library, Playwright (e2e)
Backend: Node.js, Express, Python (FastAPI, Flask), REST APIs
Databases: MySQL, sqlite3, PostgreSQL
Auth & Security: JWT, HTTP authentication
Blockchain: Bitcoin fundamentals, Lightning basics, Avalanche
Tools: Git, GitHub, Figma, Agile/Scrum

EXPERIENCE

Senior Developer — Bitcoin Dada Devs (2025 – Present)

- Maintain and ship updates to the Dada Devs website.
- Lead and coordinate peer leads across developer cohorts.
- Mentor female developers and guide alumni on projects they are building.
- Train participants in the Mastering Bitcoin pathway.
- Review PRs and promote clean coding standards across teams.

Frontend Developer — Tech Sisters Kenya (2025 – 2026)

- Built and optimized responsive UI components using React and Next.js.
- Improved accessibility and performance across multiple pages.
- Collaborated with designers and backend developers in an agile environment.
- Wrote unit and integration tests with Jest and React Testing Library.

Freelance Frontend Developer — Remote (2024 – 2025)

- Delivered production-ready web apps, including a mental wellness platform, portfolio sites, and a Bitcoin crowdfunding platform.
- Worked directly with clients to translate requirements into scalable UI solutions.

ICT Support Assistant — Capital Markets Authority (Kenya) (2020 – 2021)

- Provided technical support and troubleshooting for internal systems.
- Strengthened problem-solving, documentation, and communication skills.

OPEN SOURCE & TECH CONTRIBUTIONS

- Authored and reviewed pull requests on Bitcoin Core (bitcoin/bitcoin).
- Frontend contributor to Bitcoin Core Fees, a mempool fee-estimation tool.
- Reviewed pull requests on LNbits and Warnet (Bitcoin Dev Project).
- Contributor to Bitcoin PlainTalk.
- Contributor to Tando, the BTCPay Server Plugin.
- Contributor to Lightning Gallery (BitDevs Nairobi).
- Active in Bitcoin developer communities, including Bitcoin Dada Devs, African Bitcoiner, Btrust, and BitDevs Nairobi.

EDUCATION & TRAINING

- Base58 — Bitcoin Developer Basics (View certificate)
- Btrust Pathway 1 & 4: Mastering Bitcoin & Python Language Club
- Btrust Boss Bootcamp (4 Weeks)
- Bitcoin & Blockchain Bootcamp — BTC Dada Dev
- Web Development Bootcamp — Project Power Learn
- Frontend Bootcamp — Tech It Girls
- B.Sc. Library & Information Science — Chuka University

CERTIFICATIONS

- Isentry Technologies — Frontend Developer
- Avalanche Fundamentals & Subnet Architecture
- Technical Fundamental Support — Coursera
- Frontend Development — Tech It Girls
